

A day of solver work, measured

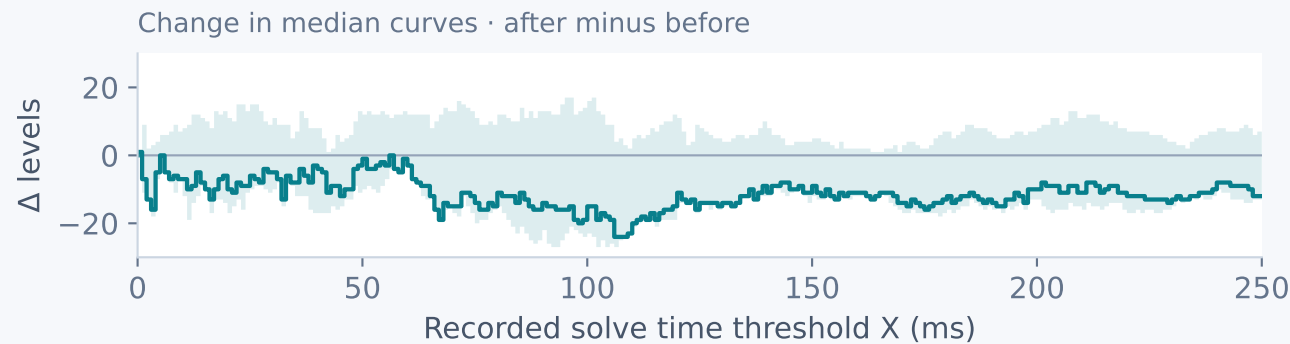

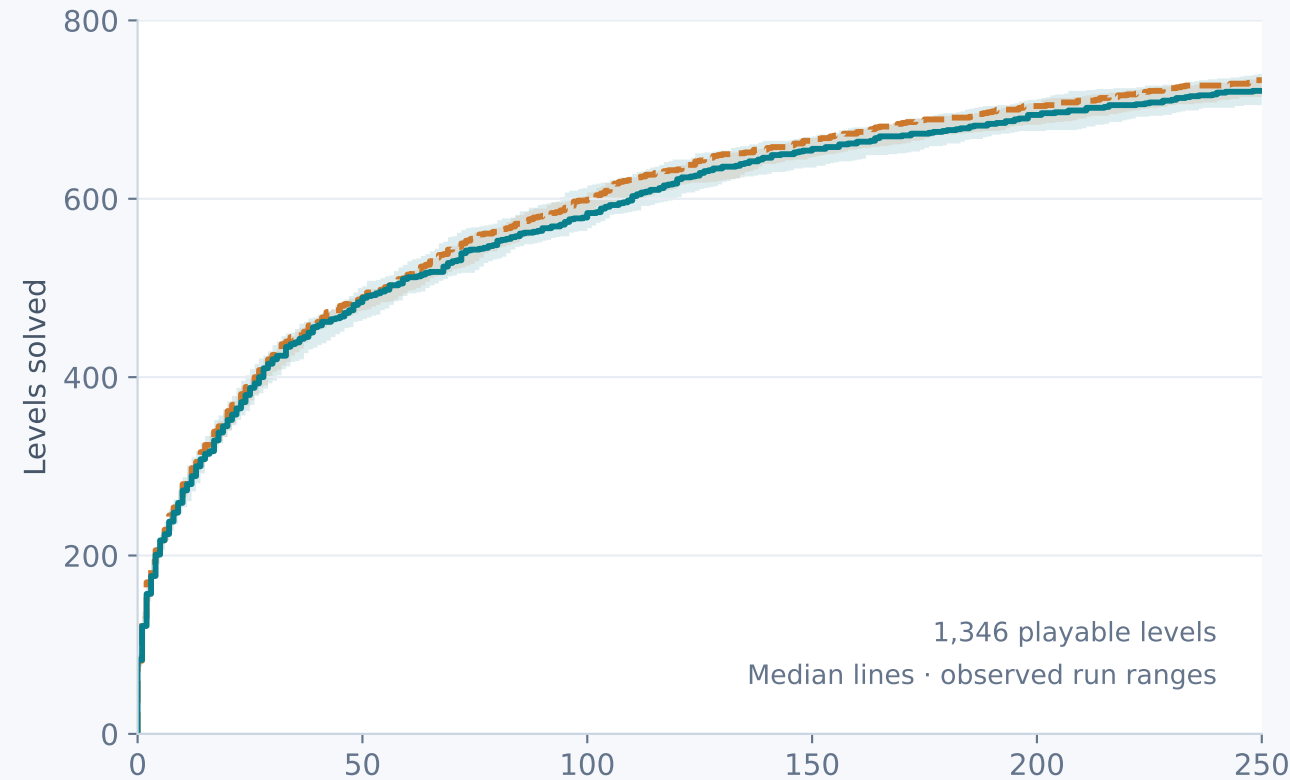

Cumulative levels solved in <X ms · 3 serial before/after pairs · 250 ms search budget

Before today After today's changes

Native C++ | Portfolio · interpreter

Median: 733 → 721 below 250 ms

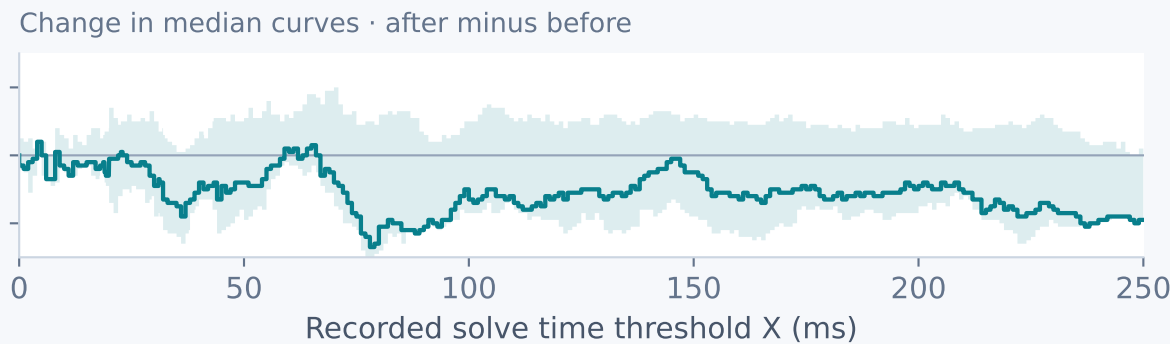

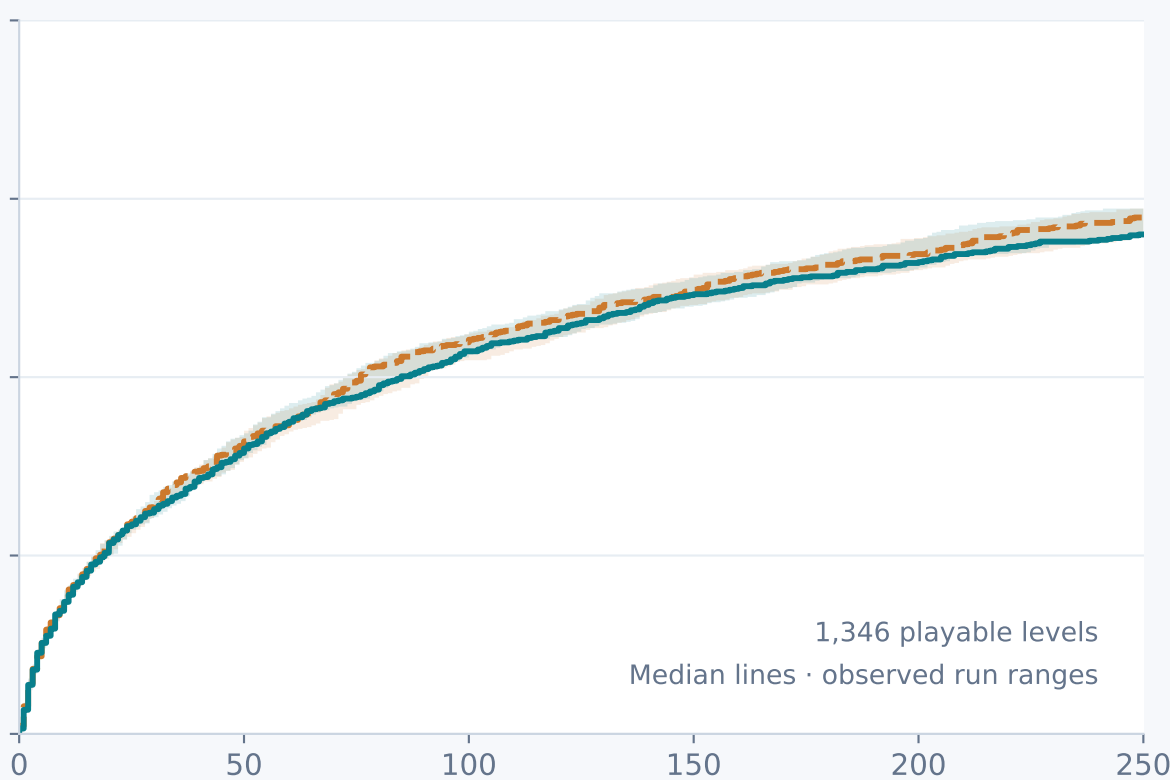

-12

JavaScript | Weighted A*

Median: 579 → 560 below 250 ms

-19

Bands show observed ranges across 3 runs (paired differences below), not confidence intervals. Counts require elapsed_ms < X.

Compilation is excluded from per-level solve times. Curves describe the measured 250 ms runs; timings are specific to this machine.
